MEMORANDUM FOR: Assistant Deputy Director (Inspection & Security)

SUBJECT: Revision of NSCID No. 1

1. I apologize for seemingly having kept you in the dark on the revision of NSCID No. 1 and realize that my dependence on dissemination to DD/A has not achieved the purposes in this case which that arrangement called for. I shall provide on a continuing basis the materials which you request and there are attached the current materials as follows: NSCID No. 1, revised, IAC-D-45, and IAC-D-45/1 through IAC-D-45/7.

2. With respect to your specific questions the term "national intelligence" is defined in NSCID No. 3. In so far as GRR, OSI, or OCI intelligence reports contain military information it is necessary to apply MIC policy which I assume will be done just as it has been done prior to the revision of NSCID No. 1. NIE's, EIC reports, or Watch Committee reports and reports collaboratively prepared by the scientific and technical intelligence offices in the community are national intelligence by definition and require the procedure that is laid out in IAC-D-45/2. You will note that under that procedure and in those cases you do not have the responsibility for checking on the MIC policy since that is the responsibility of the military agencies themselves.

3. Reference your inquiry about NIE-50 I would like to call your attention to IAC-D-45/1 which points out the meaning of SHAPE, that is, the International Staff of SHAPE.

JAMES Q. REBER
Assistant Director
Intelligence Coordination
